

STRATEGY 7 Introduces:

IBM InfoSphere

Service Oriented Architecture

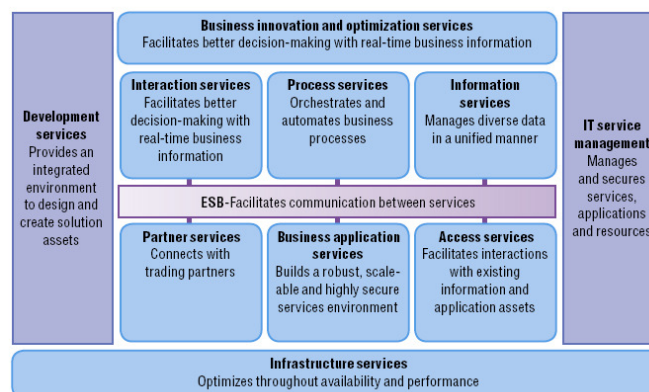

“Extends the Value of your Applications and Processes”

Now there's a new—“flexible, robust infrastructure foundation extension” available for existing Data Stage Users.

Service Oriented Architecture is designed to help current IBM Information Server customers simplify and speed deployment of information integration with the ability to translate information directly into DataStage projects significantly reducing development cycles.

IBM SOA Foundation — an integrated, open-standards-based set of software, best practices and patterns for Service Oriented Architecture. IBM SOA Foundation helps to extend the value of the applications and business processes that currently run your business, not replace them.

- IBM SOA Foundation is interoperable and fully modular -build-as-you-go basis.
- Foundation is scalable, you can start small and grow as fast as the business requires.
- Provides extensive support and facilitates greater interoperability.

Let us show you the benefits of SOA. Call Your STRATEGY 7 Representative Today—949-719-9410.
